

Mandatory application attachments for enterprises

As part of their Jems application, applicants are required to submit documentation for any project partners that are enterprises (micro, small, medium, large). This helps the programme administration assess their financial viability, as support to undertakings in difficulty (with a weak solvency) falls outside the scope of the programme.

Mandatory attachments:

1. The latest certified **annual report** for the enterprise in the application.
2. Besides this, an **extract from an official company register**, identifying the enterprise in the application, preferably in English.

1. Annual Report

To help attach the relevant file, please find here the wording typically used in the NPA area.
